Railway engineering and maintenance Volume 11, no. 8

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: . . . is made to adjust a four-section track scale 50 ft. long by means of a 20-ft. wheel-base test car, it will be impossible to determine the errors in individual sections, and in adjusting the scale to cause it to weigh the 20-ft. test car correctly, the adjustments are just as liable as not to be made on the wrong section. The result will be that while the scale has been adjusted to weigh the 20-ft. wheel-base correctly, cars of different wheel-bases may be weighed with greater errors than before the adjustments were made. In cases such as this the use of the test car has been worse than no test car at all, as a feeling of security has been produced on account of the test and adjustment of the scale and yet the actual errors which occur may be greater than before. This clearly indicates...
